

## **Nest**

Pro Attend

Android

### **Objective**

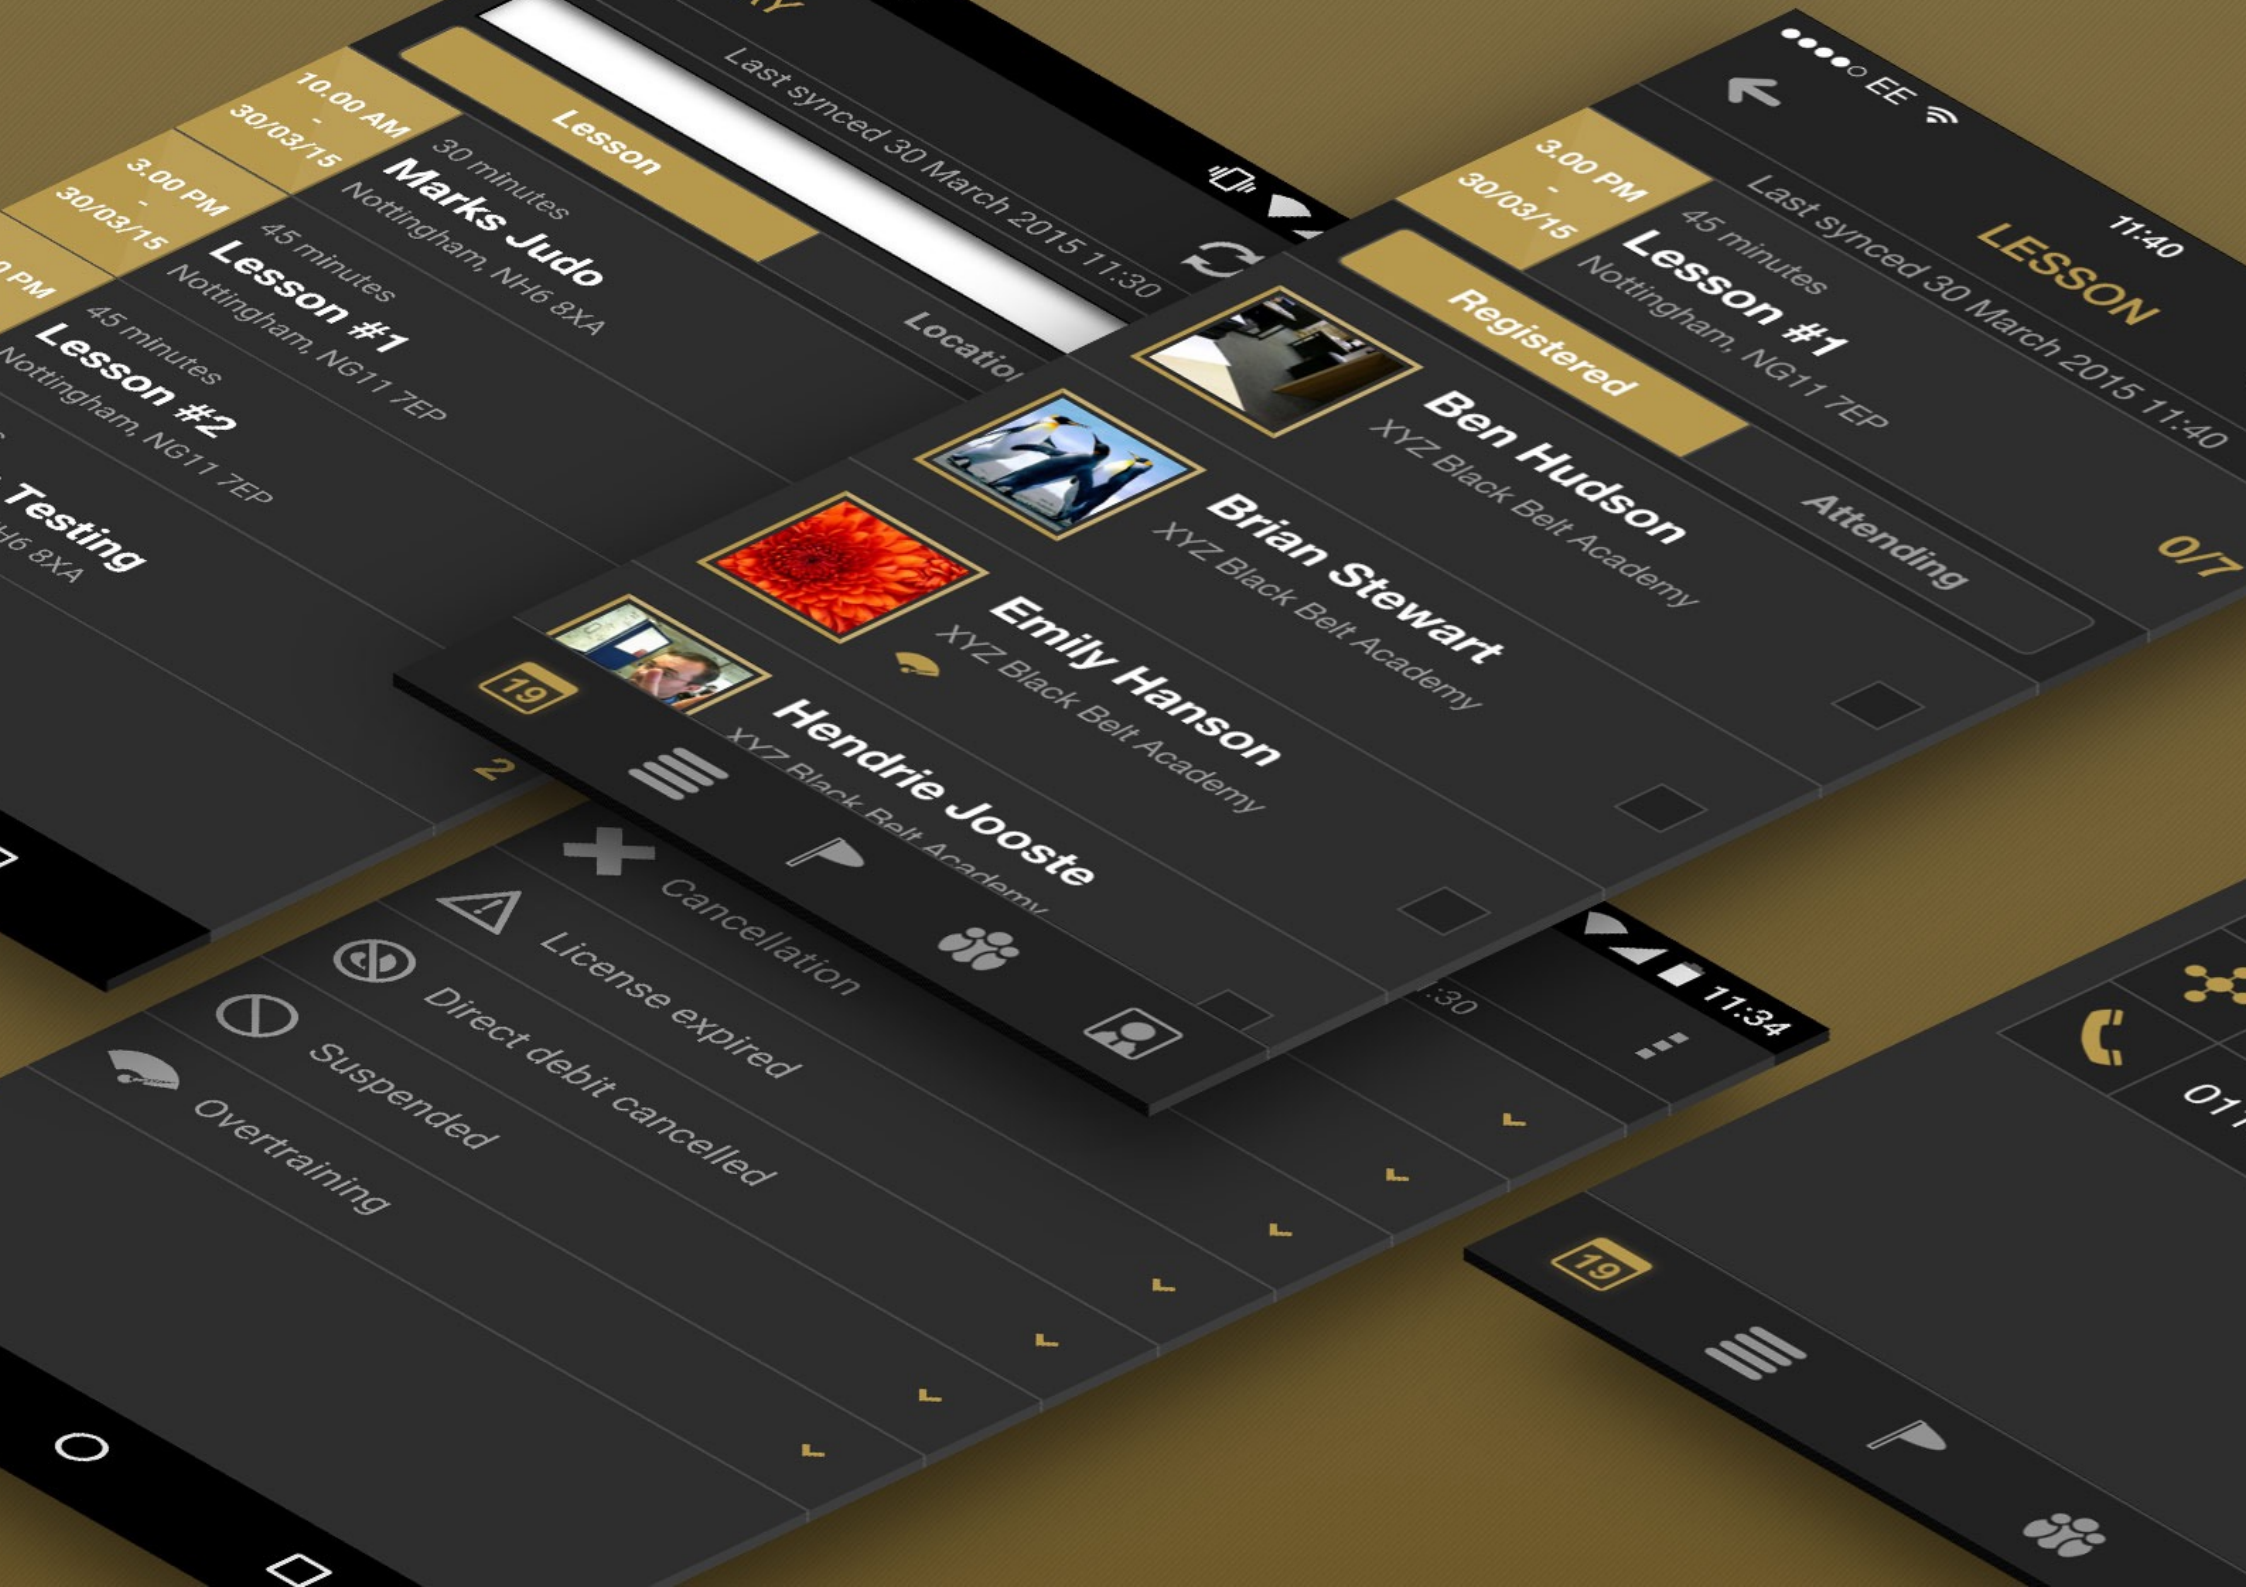

NEST, a martial arts billing and software services company, selected Mubaloo to enhance their existing iPhone app as it wasn't quite delivering the experience they wanted for their users. Mubaloo was also asked to design and develop a brand new Android app to help extend NEST's offering. The key objective of the app was to create a good user experience by making the app functional and easy-to-use for all of NEST's customers.

### **Solution**

The NEST Pro Attend app is a wrapped web app for iOS and Android that acts as a management tool for martial arts teachers. It enables martial arts teachers to boost retention by quickly and easily marking and tracking the attendance of their students, as well as allowing teachers to organise lessons and capture prospects and new student information while on the go. The app integrates with collaborative API / web services, developed to simplify legacy system integration issues.

### **Results**

NEST now has a management tool that enables their customers to manage a number of aspects of their business remotely while they are visiting multiple locations. NEST has now expanded their offering to Android users, while enhancing the user experience of their iPhone app through updated design and development.
